PRODUCTS SHIPPED

Six AI products built and shipped in the last eighteen months.*

From concept to open protocol, from framework to live registry, each one grounded in enterprise advisory practice and senior executive feedback.

* Plus the one thing that is not on the roadmap. World's first resuscitated human to complete six 250-kilometre desert ultramarathons (2017 to 2026), including four Marathon des Sables and two Ultra X Jordan. 2025 Marathon des Sables Never Give Up Award. Where the grit and the sleeves-rolled-up actually come from.

AIBVF-MCP

A pre-flight check for every AI initiative.

Model Context Protocol server, v0.2.0, shipped 22 April 2026.

aibvf-mcp is an open protocol and MCP server that any Claude agent can invoke as a pre-flight check before recommending an AI initiative. Six stdio tools return **Accelerate, Fix, or Stop** classifications against four dimensions of enterprise readiness, with Decision Confidence Scores and Organisational Drag Cost calculations drawn from a deterministic rules engine.

The engine is grounded in published benchmarks from McKinsey, Gartner, BCG, Deloitte, Forrester, Accenture, and ServiceNow. No network calls, no external dependencies, fully MIT-licensed. Available in TypeScript (@aibvf/core), Python (aibvf), and as an MCP server (aibvf-mcp).

6
STDIO TOOLS CALLABLE FROM ANY CLAUDE AGENT

7
BENCHMARK SOURCES IN THE RULES ENGINE

v0.2.0
LIVE IN THE MCP REGISTRY

Worked example, a 400 million euro retailer running a Gen2 CX initiative on traditional readiness returns **Fix at confidence 58**, with a net 11,2 to 39,2 million euro value swing, and the same organisation carries 4 to 8 million euro annual Organisational Drag Cost from running Gen2 agents inside a traditional hierarchy. Benchmark ranges are directional, calibration improves through public review.

INSTALL npm install -g aibvf-mcp

LICENCE MIT, open protocol under CC-BY-4.0

THE REST OF THE PORTFOLIO

Framework, publication, diagnostic, agents.

DECISION FRAMEWORK

Business Value Framework (BVF)

Proprietary decision framework for AI portfolios. Produces **Accelerate, Fix, or Stop** classifications with Decision Confidence Scores, grounded in McKinsey, Gartner, BCG, Deloitte, Forrester, Prosci, and EY-Oxford Saïd benchmarks. First iteration built at Accenture 2016, now in its fifth generation and powering aibvf-mcp.

In active use across healthtech and enterprise advisory engagements

PUBLICATION

The Transformation Brief

Weekly LinkedIn newsletter for senior leaders navigating AI transformation through the lens of management, governance, and behaviour. Built from scratch to **over 400 subscribers in two weeks** across Directors, Partners, and C-suite executives. Issue 04 publishes 24 April 2026.

brief.craighortonadvisory.com

SUBSCRIBER DIAGNOSTIC

The Blueprint Index Pulse

Monthly subscriber panel that tests one driver of AI readiness each issue. April 2026 driver is **Governance**. Running read published inside the Brief, raw responses captured via Supabase and a private brief.craighortonadvisory.com/pulse endpoint.

Anonymous, fifteen seconds per pulse

CLAUDE CODE AGENTS

Fourteen-plus production agents

Purpose-built Claude Code agents for daily intelligence briefings, Notion pipeline management, earnings-call scouting, career scouting and tailoring, pipeline health checks, and consulting radar. Each agent ideated, tested, and shipped into scheduled tasks inside **eighteen months**.

Operating as scheduled infrastructure

DIAGNOSTIC FRAMEWORK

AI Readiness Blueprint

Six-driver diagnostic grounded in EY, Oxford, McKinsey, and Gartner research. Tests Strategy, Governance, People, Data, Technology, and Measurement readiness. Precursor to the Pulse and the BVF, used in advisory engagements with C-suites.

Six drivers, one composite readiness score

PUBLISHED THOUGHT LEADERSHIP

Essays and Books

The Pace Layer Trap, LinkedIn essay on why agentic AI is failing in the organisations that need it most. **Reinvention as a Service**, LinkedIn series on AI transformation and GSI positioning. **Die Another Day** and **Desert Stormed**, published books on resilience and leadership under pressure.

Continuous publishing across 2017 to 2026
